# ENGLISH PROGRAMS

## A Flexible Integrated Model Kindergarten Through Grade 6

This flexible integrated model is based on the following beliefs and understandings:

- student achievement will result from a combination of discrete and connected teaching/learning experiences
- there are commonalities among the outcomes for the curriculum areas of language arts, math, science, social studies, visual arts, and health, and connections will be made wherever it is logical and natural to provide for integrated learning experiences
- this model supports 21<sup>st</sup> century learning along with the development of information literacy through a resource-based, project based learning and inquiry process learning approach
- Communication Information Technology (CIT) has a distinct curriculum with specific curriculum outcomes that are to be integrated across the other curriculum areas.

### Kindergarten

The kindergarten program of Prince Edward Island fosters children's growth and learning: socially, emotionally, intellectually, physically, and creatively, to become lifelong learners in an environment that is nurturing, play-based, and developmentally appropriate.

The kindergarten program accommodates the broad range of children's needs, as well as their learning rates and styles, which facilitates continuous learning. This is accomplished through an integrated curriculum that incorporates a variety of instructional models, strategies, and resources.

### Grades 1-6

The grades 1-6 model acknowledges that some discrete teaching/learning must occur in the context of these specific subject areas. These curriculum areas, along with LDT (Locally Determined Time – or time which can be used to provide special learning opportunities that are responsive to the needs and interests of a specific school community), account for 85% of the school day.

### Grades 1-3

Language Arts – 45%

Health – 4%

Locally Determined Time (LTD) – 5%

Math – 20%

Science – 3%

Visual Arts – 5%

Social Studies – 3%

## **Grades 4-6**

Language Arts – 30%

Math – 20%

Visual Arts – 5%

Health – 5%

Science – 5%

Social Studies – 5%

Locally Determined Time (LTD) – 5%

Although this is expressed in terms of a school day (300 minutes including recess – 5%), teachers may find it useful to think about time for some subject areas in terms of blocks of time rather than a percentage of time of each day. For example, during a six-week block, the focus may be on science rather than social studies. In another six-week block, the focus may shift to social studies.

This model also recognizes music and physical education as distinct specialist areas. Even so, there are opportunities for integration between these specialist areas and other curriculum areas which can be capitalized on when they occur (e.g., music and language arts; music and math; music and social studies). Please note that Core French is also a distinct special area at the grades 4-6 levels.

## **Grades 1-3**

Physical Education – 5%

Music – 5%

## **Grades 4-6**

Physical Education – 5%

Music – 5%

Core French – 10%

## COURSE CODES FOR ELEMENTARY SCHOOL SUBJECTS

For purposes of gathering data, a unique course code is used for each school subject. The meaning of the course codes is explained below.

The course code may be used wherever the name of a particular school subject is used in this document.

### COURSE CODING SYSTEM

The unique course code is composed of five characters. Each course code also has a course title associated with it.

Number of Characters	Field	Description
1	Grade	K = Kindergarten 1 = Grade 1 2 = Grade 2 3 = Grade 3 4 = Grade 4 5 = Grade 5 6 = Grade 6
3	Subject	Example: MAT = Mathematics, MUS = Music
1	Program	The fifth character is used as a program identifier as well as to distinguish between courses that would otherwise be identical in their coding.  A to E = English-language courses F to J = French immersion courses M to Q = French-language courses W to Z = local program courses

Examples:

3MATA = Grade 3, Mathematics, English  
 5LANF = Grade 5, Language Arts, French Immersion

## ABBREVIATIONS

Most of the instructional materials listed for the school programs and courses described in this document appear as indicated by the following example:

Title and Author	Publisher	Ratio	Stock Abbreviation Number
Robin Run by Thorn	NEL	1/p	104-0825

Please note:

1. The publisher abbreviations and the publishers are listed on the following pages.
2. The ratios at which instructional materials are provided have meanings as indicated by the following examples:
  - 1/p - one per pupil
  - 1/10p - one per 10 pupils
  - 1/t - one per teacher
  - 1/c - one per class
  - 1/s - one per school
  - 1/u - one per school board
  - 1/ws - one per work station
  - cs/s - class set per school
  - cs/t - class set per teacher
3. The item number is a unique number for each item. The numbers are assigned by the [Provincial Learning Materials Distribution Centre](#) (PLMDC).
4. There is a unique course code for each subject in the curriculum and the course code for each section is explained. Furthermore, the code is used at the beginning of the description of each course.

## **PUBLIC SCHOOL EDUCATION**

In Prince Edward Island the public school system embodies kindergarten and grades 1-12. For program planning purposes, kindergarten and grades 1-6 are the elementary grades, 7-9 are the intermediate grades and 10-12 the senior high grades. The program is taught in schools which are organized within the [English Language School Board](#) and [La Commission scolaire de langue française](#).

A full school program is available for both English language and French language education. The schools of La Commission scolaire de langue française operate in the French language. Second language courses are available in all schools, with instruction beginning not later than grade four. Early French Immersion and late French Immersion programs are available in some English language schools.

Other general information on public education is available in the following documents:

- (a) [School Act and Regulations](#)
- (b) [Annual Report of Department of Education and Early Childhood Development](#)
- (c) [A Philosophy of Public Education for Prince Edward Island schools.](#)

# PHILOSOPHY OF PUBLIC EDUCATION

The [philosophy of public education](#) for Prince Edward Island schools contains a statement of the purpose, principles and goals, summarized below, along with the supporting rationale and context.

## **Purpose**

The purpose of the Prince Edward Island public education system is to provide for the development of children so that each may take a meaningful place in society.

## **Basic Principles**

Public education in P.E.I. is based on a quality program that respects the intrinsic value of the individual and centers on the development of each child.

The public education system recognizes that education is a responsibility shared among the school, the family, and the community.

The public education system demonstrates respect and support for fundamental human rights as identified in the [Canadian Charter of Rights and Freedoms](#) and the [P.E.I. Human Rights Act](#).

The public education system reflects the character, cultural heritage, and democratic institutions of the society it serves.

The programs in the public education system reflect a contemporary view of the knowledge, skills, and attitudes that are of most worth to the individual and to society.

The goals of public education are to enable the student to:

- develop an appreciation for learning, an intellectual curiosity, and a desire for lifelong learning;
- develop the ability to think critically, apply knowledge, and make informed decisions;
- acquire the basic knowledge and skills necessary to comprehend and express ideas through the use of words, numbers, and other symbols;
- develop an understanding of the natural world and of the applications of science and technology in society;
- acquire knowledge about the past and an orientation to the future;
- develop an appreciation for one's heritage and a respect for the culture and traditions of others;
- develop a sense of self-worth;
- develop a respect for community values, a sense of personal values, and a responsibility for one's actions;
- develop a sense of pride and respect of one's community, province, and country;
- develop a sense of stewardship for the environment;
- develop creative skills, including those in the arts, and an appreciation of creativity in others;
- develop skills and attitudes related to the workplace;
- develop good mental and physical health and the ability to creatively use leisure time;
- acquire knowledge of the second official language and an understanding of the bilingual nature of the country;
- develop an understanding of gender equity issues and of the need to provide equal opportunities for all; and,
- develop an understanding of fundamental human rights and an appreciation for the worth of all individuals.

Although the family and the community have important roles to play in public education, the school's curriculum is of prime importance in addressing the goals. The curriculum may be defined as all the experiences, formal and informal, which the student encounters under the guidance of the school. The present document, *Program of Studies and Authorized Materials*, outlines the formal part of the school's program.

# ENGLISH PROGRAMS

## MANDATE

The [English Programs Division](#) provides quality English language curriculum and support services to teachers and students and provides leadership and coordination in the development of quality learning opportunities for all students in Kindergarten through grade 12.

There are more than 200 courses in the public school curriculum. With such a large number of courses, the process of course development, replacement, updating or other types of revisions is a continuous one. The procedures for conducting such work are described below.

## COURSE DEVELOPMENT/UPDATE PROCEDURE

1. The [Department of Education and Early Childhood Development](#) assesses the effectiveness of existing school courses in consideration of the Province's educational goals and the needs of students. The following information is used as part of the assessment process:
  - a. reports from teachers
  - b. submissions from school boards/district
  - c. submissions from community groups
  - d. government studies and initiatives
  - e. academic and professional literature in education
  - f. the results of provincial assessments: Primary Literacy Assessment; Elementary Literacy Assessment; and Primary Mathematics Assessment.
2. The decision of whether or not to proceed with development of a revision project is made by the department based upon:
  - a. the result of the assessment
  - b. the impact on other existing courses/programs
  - c. recommendations from appropriate curriculum committees
  - d. approval of the appropriate Standing Committee if major changes are involved
  - e. fiscal considerations.
3. The curriculum development work is carried out by an Ad Hoc Curriculum Committee in conjunction with a Department of Education and Early Childhood Development Specialist. Nominations to a committee are requested from each school board/district, and, if appropriate, from Holland College or the University of Prince Edward Island. The committee:
  - a. assesses strengths and weaknesses of the present course or program
  - b. determines, with reference to provincial education goals and any appropriate foundation documents, the outcomes for the new or revised course
  - c. evaluates instructional materials
  - d. outlines a course of studies
  - e. makes recommendations on pilot projects and in-service training for pilot teachers.

4. Based on recommendations from the Ad Hoc Committee and the Specialist, the appropriate Department of Education and Early Childhood Development Coordinator:
  - a. submits a request to the appropriate Standing Committee for approval in principle and to the Director for final approval.
  - b. consults with school boards to identify pilot schools and teachers.
  - c. ensures that pilot materials are ordered and that appropriate in-service training is carried out.
5. The Department of Education and Early Childhood Development monitors the progress of the pilot projects and provides information back to the Standing Committee. With this information the committee:
  - a. reviews the progress of the project and recommends discontinuing the project, continuing the project, or proceeding to implement a new or revised course
  - b. revises, as needed, the course of study to reflect any course changes
  - c. makes provision for in-service training and other supports which will ensure effective implementation.

The carrying out of the procedure outlined above helps ensure that high quality, effective courses are available in the schools of the province.

\*Note: The Elementary Standing Committee will pause during the 2012-2013 school year. Through consultation and collaboration with school boards, curriculum and program development, piloting, and implementation will continue.

## **FAIR PRESENTATION ON CULTURAL AND OTHER GROUPS**

The Department of Education and Early Childhood Development recognizes that fair comment is to be assured in school presentations respecting any cultural group. Furthermore, stereotypes are to be avoided, whether in association with gender or any other characteristic. Therefore, in the curriculum planning process, curriculum committees, consultants and coordinators are directed as follows:

- (i) To evaluate aims, instructional materials and courses of study to ensure that there is fair and reasoned comment upon the characteristics or practices of any cultural group. Fair and reasoned comment is characterized by, for example, providing clear and reasonably complete explanations of characteristics and practices, distinguishing between facts and inferences or value judgements in discussions of characteristics and practices, and discouraging students from making hasty value judgements about characteristics and practices of specific cultures.
- (ii) To evaluate educational aims, instructional materials and courses of study to ensure that generalizations made about people are based upon reasonable evidence and that stereotypes are voided.

The resource, [\*Evaluation and Selection of Learning Resources: A Guide\*](#) is used to evaluate instructional materials.

## ENGLISH PROGRAMS KINDERGARTEN

The English Kindergarten curriculum is shaped by the following vision:

The Kindergarten program of Prince Edward Island fosters children's growth and learning: socially, emotionally, intellectually, physically, and creatively to become lifelong learners in an environment that is nurturing, play-based, and developmentally appropriate.

### **Integrated Curriculum**

The [Kindergarten Integrated Curriculum](#) is defined by the following philosophy:

Kindergarten is a child-centred, developmentally appropriate, early childhood program for children in the year prior to grade one. The purpose of kindergarten is to nurture the continuing growth of children's knowledge and understanding of themselves and their world by providing a safe, caring, and stimulating environment where learning flourishes.

The kindergarten program on Prince Edward Island recognizes that children are individuals and that every child is unique. The program accommodates that broad range of children's needs, as well as their learning rates and styles, which facilitates continuous learning. This is accomplished through an integrated curriculum that incorporates a variety of instructional models, strategies, and resources.

Curriculum integration provides educators with a practical approach to connect outcomes in a meaningful way. It is a holistic approach that reflects the real world and prepares children for lifelong learning. Integration is above all a practice that is not learned or taught, but is lived.

The kindergarten program values the development of the whole child by recognizing:

- the individual and social nature of learning
- that children learn through active involvement and meaningful play
- the importance of developmentally appropriate practices that enhance children's learning
- the significance of all areas of development
- the early years as the strong foundation for lifelong learning.

# VISUAL ARTS

## **Rationale:**

Education in visual arts is fundamental to the aesthetic, physical, emotional, intellectual, and social growth of an individual. It provides students with unique ways of knowing, doing, living, and belonging in a global community.

Through visual arts education, students come to understand the values and attitudes held by individuals and communities. Learning in the visual arts contributes to an empathetic world view and an appreciation and understanding of relationships among people and their environments.

## **Description:**

The Prince Edward Island Arts Education curricula are shaped by a vision of enabling and encouraging students to engage in the creative, expressive, and responsive processes of the arts throughout their lives.

Students are encouraged to create ideas and images that reflect, communicate, and change their views of the world. Artistic expression involves clarifying and reconstructing personal ideas and experiences. An important part of art literacy is the development of an understanding of the nature of the arts, which includes an understanding of what artists do as individuals and as a community, how ideas are generated in the various art mediums, and what benefits are associated with these activities. Visual Arts can be regarded as a ‘text’ or commentary that reflects, records, celebrates, and passes on innovations and traditions that make us unique.

The components of the Visual Arts program consists of four strands: Fundamental Concepts; Creating and Presenting; Reflecting, Analysing, and Responding; and Form and Cultural Context.

## **Objectives of the Elementary Visual Arts Curricula:**

- The instruction is developmentally appropriate.
- The creative process is being fostered by:
  - challenging and inspiring
  - imagining and focusing
  - planning and focusing
  - exploring and experimenting
  - producing and preliminary work
  - revising and refining
  - presenting, performing, and sharing
  - reflecting and evaluating
- Critical viewing is being fostered through:
  - describing
  - analysing
  - interpreting
  - evaluating
- Self-expression, risk-taking, and problem-solving is promoted in students.
- A variety of open-ended visual arts experiences are being explored and created by students.
- Students are developing visual concepts, ideas, thoughts and feelings in a variety of media.
- Students’ exhibits are promoted.

- Students use personal art journals to reflect on their ideas, thoughts, feelings, knowledge, and experiences.
- Students are reflecting and responding to their own and others' artwork.
- Students' abilities and learning styles are accommodated.

### **Resources:**

The new resources being used for grades 1-6 are *Explorations in Art: Teacher's Wrap Around Edition*; and Fine Arts and Studio Process CD-ROM.

### **Supplementary Resources noted in the fourth column of the visual arts curricula include:**

*Adventures in Art* (student text, teacher's edition, transparencies)

Literature support books in the other curriculum areas such as Language Arts, Science

Musical support from music program

Confederation Centre of the Arts      Eptek Centre      community museums

Art to the Schools Collection      [www.nationhood.ca](http://www.nationhood.ca)      cultural festivals

Internet sites on artists, galleries, and environmental and cultural environments

### **Art Supplies to consider for a successful art program:**

paint: liquid tempera (yellow, cyan, magenta, black, white, brown, red, orange, purple, green)

block paints (yellow, cyan, magenta, black, white, brown, purple, red, green, orange)

variety of brushes: 3/4 flat, 3/4 round, 1/4 flat, 1/4 round

scissors

pencils (H2-B6)

sponges

oil pastels (set of various colours and a set of black)

crayons

coloured pencils

construction paper

Manila paper

newsprint

coloured tissue paper

mural paper

glue (stick & liquid)

masking tape

styrofoam trays

modeling clay

plasticine

string

journal

sketch pad

bristol board (for art portfolio)

erasers

### **Recycled and gathered material to consider for a successful art program:**

found objects

natural materials

tissue rolls

yarn

cardboard

seeds

beads

fabric

pipe cleaners

magazines

tin foil

coloured mylar

sticks and wooden rods

tread/spool

paper bags

egg cartons

styrofoam trays

ice cream containers

straws

toothpicks

rubberbands

stir sticks

ribbon

sequins

buttons

lace

# COMMUNICATION AND INFORMATION TECHNOLOGY (CIT) INTEGRATION

## **Rationale:**

To focus on how CIT can be used from kindergarten through grade 6 English programs and across all areas of the curriculum as part of a more global strategy that will contribute to the development of Technologically competent and literate individuals graduating from our school system.

As technology is best learned within the context of applications, activities, projects, and problems that replicate real-life situations, the CIT program of studies is structured as a 'curriculum within a curriculum', using the subjects of English Language Arts, Math, Science, Social Studies, Health, and Visual Arts as a base.

## **Advantages of Technology Integration:**

- ensures that curriculum is the focus, rather than the technology
- promotes the development of creative thinking, research, communication, and problem solving skills
- provides access to rich resources and learning experiences that extend far beyond the classroom
- motivates students to complete learning tasks and become more readily engaged in their own learning
- supports current research which suggests that people learn in a holistic fashion rather than in a compartmentalized manner
- provides teachers with an additional means to address multiple learning styles
- provides students with the opportunity throughout their school career to expand and reinforce their repertoire of technology skills
- enables the students to acquire a better understanding of how to use technology in meaningful ways
- supports contemporary approaches to education such as cooperative learning, resource-based learning and individualized learning
- ensures that all students have the opportunity to develop technological competencies
- prepares students to select appropriate technologies to complete tasks
- provides teachers with an opportunity to model lifelong learning as students witness teachers learning and using new skills for a purpose

The documents **Working Toward Communication and Information Technology Literacy Kindergarten to grade 6** have been distributed and implemented. These documents contain descriptions of CIT Outcomes, lesson plans and links to Specific Curriculum Outcomes.

These documents are also available online at:

## **CORE FRENCH GRADES 1 - 3**

Core French Grades 1 - 3 will be handled on a Local Pilot basis.

## **CORE FRENCH GRADES 4 - 6**

### **Description**

This second language program is intended for the beginning student of French. It provides a dynamic and pleasurable introduction to the language. The program focuses on the development of all four communication skills - listening, speaking, reading and writing - in French, as well as contributes significantly to the general education of the learner.

The program is organized around themes that reflect the interests and experiences of the elementary student with each theme culminating in the completion of a final project. Throughout each theme, students are actively involved in a variety of activities which allow for meaningful communication to occur in French; consequently students acquire knowledge and language skills necessary to successfully complete the project.

### **Course Outline Information**

The [\*Elementary Core French Curriculum Guide\*](#) (2000 Bilingual version) is available from PLMDC.

### **Time Allocation for Core French Programs**

During the 1999-2000 academic year, a sub-committee of the Elementary Standing Committee reviewed the *Report of the Elementary Education Committee, 1990* and reconfirmed the recommended time allotment of 10% for elementary Core French classes. Shorter classes (30 minutes) may be offered on a per day basis, or preferably longer classes (60 minute classes) may be offered every second day. This is equivalent to 90 hours of French instruction per year.

## **HEALTH**

Health education involves learning about the habits, behaviours, interactions, and decisions related to healthy daily living and planning for the future. The home, school, and community play important roles in contributing to the healthy personal development of students, by providing an opportunity for them to consider information and acquire, practise, and demonstrate strategies for dealing with the challenges of life and living.

The aim of the health curriculum is to enable students to make well-informed, healthy choices and to develop behaviours that contribute to the well-being of self and others.

The specific outcomes for the grades 1-6 health curriculum are organized in three strands:

- Wellness Choices
- Relationship Choices
- Life Learning Choices

Integration of health content with other curriculum areas is encouraged.

### **Additional Notes**

1. Parents must approve of their children enrolling in the human sexuality section of the grade 6 course.
2. Parents may choose not to have their children participate in grade 5 classroom instruction related to abuse prevention.

## LANGUAGE ARTS

The English language arts curriculum is shaped by the vision of enabling and encouraging students to become reflective, articulate, literate individuals who use language successfully for learning and communicating in personal and public contexts.

The curriculum is defined in terms of outcomes organized around the processes of speaking and listening, reading and viewing, and writing and other ways of representing. These outcomes are contained in the following curriculum guides:

- [Atlantic Canada English Language Arts Curriculum: Grades Entry-3](#)
- [Atlantic Canada English Language Arts Curriculum: Grades 4-6](#)
- CAMET Reading and Writing Achievement Standards Grades 1-6
  - [Reading Achievement Standards Grade 1](#)
  - [Writing Achievement Standards Grade 1](#)
  - [Reading Achievement Standards Grade 2](#)
  - [Writing Achievement Standards Grade 2](#)
  - [Reading Achievement Standards Grade 3](#)
  - [Writing Achievement Standards Grade 3](#)
  - [Reading Achievement Standards Grade 4](#)
  - [Writing Achievement Standards Grade 4](#)
  - [Reading Achievement Standards Grade 5](#)
  - [Writing Achievement Standards Grade 5](#)
  - [Reading Achievement Standards Grade 6](#)
  - [Writing Achievement Standards Grade 6](#)

### Grades 1-3 Resources

Resources for the grades 1-3 are ***Literacy Place for the Early Years***. These materials were selected to accommodate a wide range of multi-level reading materials, interests and learning styles. The reading component of this resource includes Read Aloud, Shared Reading, Guided Reading and Independent Reading. The writing section incorporates Modelled, Shared, Guided, and Independent Writing into text-type studies, literature responses and independent writing. The Working With Words and Oral Language components are integrated across reading and writing activities. ***Literacy Place for the Early Years*** is based on a strategy approach to literacy teaching and learning. It includes a selection of fiction and informational text types.

### Grades 4-6 Resources

Grade 4-6 resources are ***Moving Up With Literacy Place***. These materials were selected to accommodate a wide range of multi-level reading materials, learning styles, and interests. The resources are based on a strategy approach to literacy instruction and learning and include 8 strategy units, book clubs, and guided reading materials.

The resources from grades 1-6 are intended to engage students, inspire talk about texts, and encourage reading, viewing, writing, and other ways of representing.

**Working With Words** is a key component of the new comprehensive grades 1-6 language arts resources and should be utilized. For specific concepts and strategies, please refer to:

Grades 1-3: ***Working With Words Guide***

Grades 4-6: **Literacy Support Guide  
Program and Planning Guide  
Professional Support DVD**

The ***Continuum of Literacy Learning*** has been provided for all grade 1 through 6 teachers. This learning continuum is designed to help educators notice, teach, and support specific behaviours and understandings that students must acquire to become highly effective readers, writers, and users of oral language.

Teachers are encouraged to refer to the Program Design and Components of the *English Language Arts Curriculum Guide*, both [Entry-3](#) and [4-6](#) for guidance for appropriate instructional practices around spelling.

(The *Canadian Spelling Program* [Nelson] is also available for grades 4-6. The *Canadian Spelling Program* is a provided resource that teachers *may* choose to use, and if they do so, does not have to be used in a linear fashion.)

# MATHEMATICS

## Description

The Prince Edward Island mathematics curriculum is shaped by a vision which fosters the development of mathematically literate students who can extend and apply their learning and who are effective participants in an increasingly technological society. The teaching and learning in mathematics activities and classrooms should enable all students to:

- learn to value mathematics
- become confident in their ability to do mathematics
- become mathematical problem solvers
- learn to communicate mathematically
- learn to reason mathematically.

Fundamentally, mathematics is a set of ideas. The intent of the PEI mathematics curriculum is to ensure that students understand these ideas, not just master the rules and procedures. At the same time, it is essential that students accomplish a certain level of skill proficiency so that they have the tools to solve interesting and relevant problems. Practice of skills is usually more effective if the practice arises in meaningful contexts.

The outcomes for the mathematics curriculum are organized in terms of four content strands:

- number
- patterns and relations
- shape and space
- statistics and probability.

In summary, instructional practices in mathematics should promote:

- classrooms as mathematical communities
- logic and mathematical evidence as verification
- mathematical reasoning
- conjecturing, inventing and problem-solving
- connecting mathematics, its ideas and its applications
- visualization
- mental computation.

The PEI Elementary mathematics curriculum guides provide specific curriculum guidance for teachers and students.

The math curriculum has recently been restructured based on the [Western and Northern Canadian Protocol](#) (WNCP).

This new restructured curriculum and supporting resources for grades [1](#), [2](#), [4](#) were implemented in 2009-2010. Grades [3](#) and [5](#) were implemented in 2010-2011. Grade 6 was implemented in 2011-2012.

# MUSIC

## Rationale

Within the PEI education system, music is recognized as an important component of a student's education. The benefits derived from the study of music are many and contribute significantly to a well-rounded education. Music is considered essential to fully prepare students for the world in which they live. A minimum of 90 minutes of music instructional time per 6-day cycle is required in order that the appropriate content and skills may be taught. This would equal 5% time on task.

## Course Outline Information

The [\*Elementary Music Curriculum Guide, Grades 1-6\*](#) contains a description of the required program for the province.

## Description

The music program is shaped by a vision of enabling and encouraging students to engage in the creative, expressive, and responsive processes of music throughout their lives.

The components of the program consist of musical participation; musical understanding; musical awareness and appreciation; and musical technologies.

## Objectives

Through this program students will learn to:

- develop competency in problem solving, critical thinking and decision-making through experiences with music.
- develop literacy in music including listening, singing, and/or playing instruments, reading, and writing music.
- develop a positive attitude towards music.
- develop an appreciation of music and the importance of music in our own cultures and others through participation and reflection.
- understand that music contributes to the general development of the learner.

## Additional Programs:

Musical programs such as "Strings" may be offered at schools as either:

1. an instrumental studies component in the existing music curriculum (Please note that this would be a small component in the music curriculum and would not have the depth and breadth of the existing strings program) or
2. an additional program that may fit into the school's regular schedule (Locally Determined Time 5%) or as an extra-curricular offering.

The Department of Education and Early Childhood Development will continue to offer curriculum resources as outlined in the Program of Studies to any school that chooses to offer this additional program.

If strings instruction is offered, books selected from the elementary list of authorized instructional materials may be provided. The number to be allotted will be decided by the teachers concerned and the Arts Education Curriculum Specialist.

## PHYSICAL EDUCATION (KPEDA-6PEDA)

### Description

The aim of the physical education curriculum is to provide opportunities for students to develop knowledge, skills, and positive attitudes toward active living. The curriculum will support students in acquiring the understandings and skills to engage in movement activity and to develop a solid foundation for a balanced lifestyle.

The specific outcomes for the recently implemented grades [K-6 physical education curriculum](#) are organized within three goals. The goals are interdependent and are of equal importance. The three goals for students from kindergarten to grade 6 are the following:

- Active Living - Students will enjoy and engage in healthy levels of participation in movement activities to support lifelong active living in the context of self, family, and community
- Skilful Movement - Students will enhance quality of movement by understanding, developing, and transferring movement concepts, skills, tactics, and strategies to a wide variety of movement activities.
- Relationships - Students will balance self through safe and respectful personal, social, cultural, and environmental interactions in a wide variety of movement activities.

## PROJECT BASED LEARNING

Project Based Learning (PBL) is a teaching and learning methodology in which students engage in a rigorous, extended process of inquiry focused on complex, authentic questions and problems as they achieve the knowledge, skills, and attitudes defined by the curriculum outcomes. A set of learning experiences and tasks guide students in inquiry toward answering a central question, solving a problem or meeting a challenge, as opposed to several activities tied together under a theme, concept, time period, culture, or geographic area (e.g., the Renaissance, the ocean, WWII, Canada). Throughout the project, students work as independently from the teacher as possible, and have some degree of “voice and choice”.

PBL is unlike traditional projects in the sense that it is informed by the curriculum and *drives* the instruction and learning, as opposed to involving students in a “fun activity” or “making something”. It is often focused on creating physical artifacts but must involve other intellectually challenging tasks and products focused on research, reading, writing, discussion, investigation, and oral presentation. Through PBL, students can develop and demonstrate in-depth understanding of academic knowledge and skills while enhancing habits of mind, along with collaboration, critical thinking, and communication skills. PBLs can be interdisciplinary in nature and allow for curriculum integration from different subject areas within one project. This learning experience ends with a high-quality product or performance created by the student(s) and presented to a public audience.

Two important components of PBL are the creation of a driving question and the collaboration with a Subject Matter Expert (SME).

### The Driving Question

A well-crafted *driving question* is essential to all effective PBLs. It is this question that will form the basis of explicit links with the curriculum, create the focus of the project for the students, and encourage their process of inquiry and investigation. All driving questions should be provocative, challenging, open-ended, and complex and must be linked to the core of what students are to learn as determined by the provincially authorized curriculum. Sample driving questions might include:

- Who are the heroes of our community?
- When is war justified?
- What effect does population growth have on our society?
- Is watching TV beneficial or harmful to teenagers?
- How can we create a piece of media to demonstrate diversity in our school?

Students may work in collaborative teams or individually to investigate, research, and refine knowledge and skills to adequately answer the driving question. Because the driving question is open-ended, students are able to reach a variety of potential conclusions in countless ways, while still building in-depth knowledge and skills. This creates the independent nature of the project and also the feeling of “voice and choice” for the students. The teacher then assumes more of a facilitator/coach role, assisting and guiding during an investigation and providing direct instruction when necessary.

### Subject Matter Expert (SME)

A well crafted PBL also includes the role of a *Subject Matter Expert*, or *SME*. These individuals/groups play a key role in PBL as they bring first-hand authentic knowledge and experience from the specific content field to the classroom. They may be sought out by the student(s) during their investigation or prearranged by the teacher depending on the project. These experts provide additional support and information to the students related to the topics and help demonstrate to the students that the work they are completing is authentic and “real-world”. The involvement of these experts allows educators to expand the classroom walls and make strong connections and links with surrounding communities.

At the conclusion of the PBL, students are required to present their findings to a public audience. Their peers in the classroom may act as the dress rehearsal for this presentation and provide valuable feedback to refine the presentation. However, in order to “raise the stakes” for the students’ final presentation, students should present their findings to members of the community, experts in the field (including the involved SME), parents, or school administration in addition to presenting to their classroom peers.

Adapted from *PBL Starter Kit*, (2009) The Buck Institute for Education. (<http://www.bie.org/>)

## RESOURCE-BASED LEARNING & SCHOOL LIBRARY PROGRAMS

The CAMET/APEF and Prince Edward Island curricula and programs promote resource-based learning as a key instructional approach across all grade levels, subjects, and disciplines. This means that the integrated school library program should support the development of students' information literacy through resource-based learning activities at all grade levels across the curriculum. Resource-based learning actively involves students in the effective use of a wide range of print, non print, electronic and human or community resources. Teachers and Teacher-Librarians need to ensure that all students are involved in activities emphasizing skills and strategies required to think critically about the information they access, use, and apply, regardless of the source or format. They also need to assess students' learning (process and products) for evidence of 'learning about' rather than simply 'finding out about' information-related topics, problems and issues.

Schools should have a plan for making optimal use of the school library (facility, collection of learning resources, and instructional program), and for ensuring that students are achieving the skills outlined for their specific grade level in the [School Library Skills Continuum](#). The school library's centralized collection of learning resources should include print (books, periodicals, etc. including fiction and nonfiction) non print materials (including audio, visual, databases, computer software) and the equipment necessary to manage, use or produce them. Collections of learning resources need to be viewed from several perspectives; on-site, local, regional and global, and selected primarily to support the provincially authorized curriculum and learners' needs. Library-resource centres are increasingly viewed as access points to information within and beyond the school; learning resources, including human resources, are frequently accessed or borrowed and shared among other school or public collections and from community agencies.

The selection of supplementary learning resources for school library collections is another important part of the role for all school library personnel. Selection lists of suggested resources across the various curriculum areas, as well as information about a variety of selection aids and sources for assistance (print, online and specialist's services) is available in the *PEI School Library Handbook* located in your library. The Department of Education and Early Childhood Development has also developed the [Evaluation and Selection of Learning Resources: A Guide](#) document to assist educators with the selection and evaluation of materials.

# SCIENCE

The PEI/APEF science curriculum is guided by the vision that all students, regardless of gender or cultural background, will have an opportunity to develop scientific literacy. Scientific literacy is an evolving combination of the science-related attitudes, skills, and knowledge that students need to develop inquiry, problem-solving, and decision-making abilities, to become lifelong learners, and to maintain a sense of wonder about the world around them.

## 1SCIA Science

### Description

Students will address science-technology-society-environment (STSE) and skills outcomes in the following topic areas: *Materials, Objects and Our Senses; Needs and Characteristics of Living Things; and Daily and Seasonal Changes*. The topics are supported by literature selections that allow for integration with other subject areas such as language arts, mathematics, and social studies.

## 2SCIA Science

### Description

Students will address science-technology-society-environment (STSE) and skills outcomes in the following topic areas: *Animal Growth and Changes; Liquids and Solids; Relative Position and Motion; and Air and Water in the Environment*. The topics are supported by literature selections that allow for integration with other subject areas such as language arts, mathematics, and social studies.

## 3SCIA Science

### Description

Students will address science-technology-society-environment (STSE) and skills outcomes in the following topic areas: *Plant Growth and Changes; Materials and Structures; Invisible Forces; and Exploring Soils*. The topics are supported by literature selections that allow for integration with other subject areas such as language arts, mathematics, and social studies.

## 4SCIA Science

### Description

Students will address science-technology-society-environment (STSE), skills and knowledge outcomes in the following topic areas: *Habitats and Communities; Light; Sound and Rocks, Minerals and Erosion*. The topics are supported by literature selections that allow for integration with other subject areas such as language arts, mathematics, and social studies.

## **5SCIA Science**

### **Description**

Students will address science-technology-society-environment (STSE), skills and knowledge outcomes in the following topic areas: *Meeting Basic Needs and Maintaining a Healthy Body*; *Properties and Changes in Materials*; *Forces and Simple Machines*; and *Weather*. The topics are supported by literature selections that allow for integration with other subject areas such as language arts, mathematics, and social studies.

## **6SCIA Science**

### **Description**

Students will address science-technology-society-environment (STSE), skills and knowledge outcomes in the following topic areas: *Diversity of Life*; *Electricity*; *Flight*; and *Space*. The topics are supported by literature selections that allow for integration with other subject areas such as language arts, mathematics, and social studies.

# SOCIAL STUDIES

## 1SOCA Social Studies

### *Interaction*

#### **Description**

The grade 1 social studies curriculum focuses on *Interactions* within the world and is organized into four units - Groups, Environments, Place and Time, and Needs and Wants. Students will investigate the daily interactions that occur between themselves and others, and between people and their environments. Students will also explore the history and geography relationship in Place and Time, and the economic connections of needs and wants being met by the provision of goods and services. Students will develop an understanding of how their world is interconnected with many other areas.

## 2SOCA Social Studies

### *Change*

#### **Description**

The grade 2 social studies curriculum focuses on *Change*, a critical concept in social studies. The program is organized into four units - People, Technology, Economics, and Environments. Students will examine ways in which change affects their daily lives, the lives of others, and the community around them. They will explore changes in technology over time, how work has changed over time, and how and why physical changes occur in their environments. Students will construct an understanding of change to include how it is important to their futures in terms of development and sustainability.

## 3SOCA Social Studies NEW!

### *Provincial Identity*

#### **Description**

Provincial Identity is the central theme of the new grade 3 social studies curriculum. The program builds upon concepts to which students have been introduced in previous years, this time focusing on their own province. The curriculum is organized into three units: Place, Peoples, and Citizenship. The first unit, Place, allows students to explore the geographical features of their own province, its location in the Atlantic region, Canada and the world. The second unit, Peoples, explores culture and community that examines shared values and promotes an understanding of diverse cultures and traditions within the province. The third unit, Citizenship, examines the concept of power, authority, and decision-making in the study of how people are governed within the province and the meaning of active citizenship.

A [\*Global Classroom\*](#) Initiative component has been designed specifically for PEI classrooms and provides materials with a direct PEI - Kenya link.

## 4SOCA Social Studies

### *Exploration*

#### **Description**

The grade 4 social studies curriculum focuses on *Exploration*. In units 1 and 2, students will develop both an understanding of what exploration is, the various aspects of exploration including stories of impact on both, the people exploring and the people, place, or idea explored. In unit 3, students study the physical environment of the world, noting similarities and differences in physical features in various parts of the world. Students examine the concept of how humans and the environment interact. Students have the opportunity to examine how humans have impacted the environment and how the environment has impacted where people live and work. The final unit concentrates on Canada and examines the physical landscape of the country, the human landscape, the political landscape and finally the symbols that give us our identity.

## 5SOCA Social Studies

### *Investigating Past Societies*

#### **Description**

The grade 5 social studies curriculum focuses on *Investigating Past Societies*. Students will examine the roles of historians and archaeologists in uncovering evidence from the past. They will use historical inquiry to consider how knowledge of the past is constructed. Students will examine various societies from past eras including ancient, Middle-Age, pre-Contact Canada, and early Aboriginal, French, and British, as well as any resulting interactions during and as a result of Contact. Students will also study decision-making practices of First Nations and Inuit. This course concludes with students comparing their own society with societies of the past.

## 6SOCA Social Studies

### *History of Prince Edward Island*

### *World Cultures*

#### **Description**

The grade 6 social studies curriculum focuses on two areas of study: *History of Prince Edward Island* and *World Cultures*. PEI History is designed around seven unifying ideas: *Timeline, People, Transportation, Government, Economy, Lifestyles, and Culture*. The study begins with a “big-picture” look at a time line of Island history and then narrowing to the past 500 years with an emphasis on changes over time. Students will work with a collaborative time line throughout the course of study, adding events, persons, and other notable milestones along the way. The culminating activity provides students with the opportunity to reflect upon what they have learned about P.E.I. History and its influence on their lives today. The [\*Prince Edward Island Historic Places\*](#) binder has been designed specifically to enrich students’ learning experiences throughout the grade 6 social studies curriculum. This resource can be used to bring history to life and to bring life to history as students learn about and understand PEI’s past. *World Cultures* will provide students an opportunity to explore the larger world and its diverse cultures.

An integral part of this study will be World Issues including the distribution of wealth, human rights issues, and rights and responsibilities of global citizens. A [\*Global Classroom Initiative\*](#) component, designed specifically for PEI classrooms, provides materials for this unit with a direct PEI - Kenya link. While the two areas of study combined are designed to fulfil a full-year’s program, approaches to delivery may vary and will be at the discretion of the teacher. An integrated approach is possible and provides opportunities to incorporate Language Arts, as well as other subjects, content, and skills.

# FRENCH IMMERSION PROGRAMS

## Introduction

French Immersion is a school program designed to develop bilingual fluency in students as well as positive attitudes towards the French language and culture.

## Objectives

- To enable students to pursue their education in either French or English.
- To develop skills for employment in which the working language is either French or English.
- To enable students to live in either English or French communities with linguistic and cultural ease.

## Early French Immersion (EFI)

Starting at the kindergarten level, all or most of the instruction is given in French in all subjects. An English Language Arts program taking up 20% of the school day is introduced at grade 4.

An approximate breakdown of time allocated to the French/English components in elementary school is as follows:

Kindergarten, grades One, Two and Three	- 90% French instruction
Grade Four, Five and Six	- 65% French instruction - 35% English instruction

The Department of Education and Early Childhood Development has authorized programs of study for students in grades one to twelve French Immersion.

## Middle Immersion (MI)

Middle Immersion Program begins at grade 4. Most of the instruction is given in French. An approximate breakdown of the time allocated to the French/English components in elementary schools is as follows:

Grades 4 to 6	- 75% French Instruction - 25% English Instruction
---------------	---

## Time Allocation for French Immersion Programs

In 1990, a review of elementary education was completed and the *Report of the Elementary Education Committee* published. The Minister of Education stated general approval of the report and committed the Department to acting on some of its recommendations.

During the 1999-2000 academic year, a sub-committee of the Elementary Standing Committee reviewed these recommendations and proposed the following integrated models which will remain in effect for the 2012-2013 academic year.

This flexible integrated model is based on the belief that student achievement will result from a combination of discrete and connected teaching/learning experiences. It is understood that there are commonalities among the outcomes for the curriculum areas of language arts, math, science, social studies, art, and connections will be made wherever it is logical and natural to provide for integrated learning experiences. The model supports the development of information literacy through a resource-based and inquiry process learning approach. It also promotes technological competence through the integration of information and communication technologies (CIT) across the curriculum.

### Grades One to Three

French Language Arts	45%	Mathematics	20%
Science/Health	6%	Social studies	5%
Art	4%	Phys. Ed.	5%
Music	5%	Recess	5%
L.D.T.	5%		

### Kindergarten

It is intended that teachers will use an integrated delivery model. The integration is the drawing together of the natural connection among various curriculum areas to assist children in making sense of their world. It can be facilitated in many ways. These strategies include but are not limited to literacy-based integration, project approach, emergent curriculum, mind mapping, K-W-L charts, six-step planning model and multiple intelligences.

- Notes:
- 1) A minimum of 90% of instruction time in French is recommended for Early immersion programs at this level.
  - 2) L.D.T., Music or Phys. Ed. could be offered in French to successfully meet this recommendation.

### Grades Four to Six

French Language Arts	25%	Mathematics	20%
Science/Health	6%	Social Studies	6%
Art	3%	Phys. Ed.	5%
Music	5%	Recess	5%
English Language Arts	25%		

- Notes:
- 1) A minimum of 65% of instruction time in French is recommended for Early immersion programs at this level.
  - 2) L.D.T. is integrated into Language Arts area.

Although this is expressed in terms of a school day (300 minutes including recess - 5%), teachers will find it useful to think about time for some subject areas in terms of blocks of time rather than a percentage of time of each day. For example, during a six-week block, the focus may be on science rather than social studies. In another six-week block, the focus might shift to social studies.

## **ART (EARLY FRENCH IMMERSION)**

### **Description**

The art program is shaped by a vision of enabling and encouraging students to become creative, reflective, and articulate individuals who use art in learning and communicating within private, public and technological contexts.

The components of the program consist of art expression, technique and skills development, aesthetic awareness, and cultural, historical, and environmental awareness.

### **Objectives**

Through this program students will learn to:

- appreciate the usefulness and value of art in many genres e.g., drama, music, film, literature mathematics, science and technology.
- demonstrate creative power, i.e., display confidence and competence in his/her ability to create art.
- communication through creative media expression.
- engage in creative thinking and problem solving.

### **Course Outline Information**

Curriculum draft is currently being revised.

### **Additional Note**

The resource being used, *L'Image de L'Art Plus*, consists of teacher's manual, student's text, and a kit containing reproductions of artwork.

## COMMUNICATION AND INFORMATION TECHNOLOGY (CIT) INTEGRATION – FRENCH IMMERSION

### **Rationale:**

To focus on how CIT can be used from kindergarten through grades 1-6 French Immersion and across all areas of the curriculum as part of a more global strategy that will contribute to the development of technologically competent and literate individuals graduating from our school system.

As technology is best learned within the context of applications, activities, projects, and problems that replicate real-life situations, the CIT program of studies is structured as a 'curriculum within a curriculum', using the subjects of English Language Arts, Math, Science, and Social Studies, Health, and Visual Arts as a base.

### Advantages of Technology Integration:

- ensures that curriculum is the focus, rather than the technology
- promotes the development of creative thinking, research, communication, and problem solving skills
- provides access to rich resources and learning experiences that extend far beyond the classroom
- motivates students to complete learning tasks and become more readily engaged in their own learning
- supports current research which suggests that people learn in a holistic fashion rather than in a compartmentalized manner
- provides teachers with an additional means to address multiple learning styles
- provides students with the opportunity throughout their school career to expand and reinforce their repertoire of technology skills
- enables the students to acquire a better understanding of how to use technology in meaningful ways
- supports contemporary approaches to education such as cooperative learning, resource - based learning and individualized learning
- ensures that all students have the opportunity to develop technological competencies
- prepares students to select appropriate technologies to complete tasks
- provides teachers with an opportunity to model lifelong learning as students witness teachers learning and using new skills for a purpose

The documents *Working Toward Communication and Information Technology Literacy Kindergarten to grade 6* have been distributed and implemented. These documents contain descriptions of CIT Outcomes, lesson plans and links to [Specific Curriculum Outcomes](#).

## FRENCH LANGUAGE ARTS

### Vision

The Prince Edward Island French Immersion curriculum is based on the vision of educating students who are able to communicate effectively in French, use French as a learning tool, and demonstrate an understanding of various cultures, particularly the culture of francophone communities.

### Description

French language arts makes up most of the program in the early grades as teachers develop the four basic skills of listening, speaking, reading and writing in French. The *Foundation for the French Language Arts in Immersion Programs in Atlantic Canada 2001* provides a framework for the French program. A detailed curriculum guide for the French language Arts program at each level is available from the [French Programs Division](#) of the Department of Education and Early Childhood Development.

## **HEALTH (EARLY FRENCH IMMERSION)**

### **Description**

The general objectives of the Health Program are to help the students develop the knowledge, skills, and attitudes they need to ensure good health behaviour. Topics covered include safety; growth and development; bones and muscles; teeth; nervous, circulatory and respiratory systems; eyes, ears and head; health care. Emphasis is also put on the prevention of smoking and drug abuse.

Health education involves learning about the habits, behaviours, interactions, and decisions related to healthy daily living and planning for the future. The home, school, and community play important roles in contributing to the healthy personal development of students, by providing an opportunity for them to consider information and acquire, practise, and demonstrate strategies for dealing with the challenges of life and living.

The aim of the health curriculum is to enable students to make well-informed, healthy choices and to develop behaviours that contribute to the well-being of self and others.

The specific outcomes for the grades 1-6 health curriculum are organized in three strands:

- Wellness Choices
- Relationship Choices
- Life Learning Choices

Integration of health content with other curriculum areas is encouraged.

### **Additional Notes**

1. Parents must approve of their children enrolling in the human sexuality section of the grade 6 course.
2. Parents may choose not to have their children participate in grade 5 classroom instruction related to abuse prevention.

## LANGUAGE ARTS (ENGLISH FOR FRENCH IMMERSION) GRADES 4-6

The English language arts curriculum is shaped by the vision of enabling and encouraging students to become reflective, articulate, literate individuals who use language successfully for learning and communicating in personal and public contexts.

The curriculum is defined in terms of outcomes organized around the processes of speaking and listening, reading and viewing, and writing and other ways of representing. These outcomes are contained in the following curriculum guides:

<a href="#"><u>Atlantic Canada English Language Arts Curriculum: Grades Entry-3</u></a>	PEI	1/t	101-1006
<a href="#"><u>Atlantic Canada English Language Arts Curriculum: Grades 4-6</u></a>	PEI	1/t	104-4007
<a href="#"><u>Achievement Standards for Reading and Writing End of Grade 3</u></a>	PEI	1/t	103-3435
<a href="#"><u>Achievement Standards for Reading and Writing End of Grade 4</u></a>	PEI	1/t	104-4431
<a href="#"><u>Achievement Standards for Reading and Writing End of Grade 5</u></a>	PEI	1/t	105-5385
<a href="#"><u>Achievement Standards for Reading and Writing End of Grade 6</u></a>	PEI	1/t	106-6360

Supplements to these guides are

**English Component Early French Immersion:**

**Year 1 - The Transitional Year**

PEI 1/t 104-4130

**English Component Early French Immersion: Year 2 - Grade 5**

PEI 1/t 105-5132

Resources provided for Grade 4 are the read aloud, shared reading and some of the guided reading books from *Literacy Place for the Early Years* Grade 3. Additional Guided reading materials have also been provided from the *Moving Up With Literacy Place* Grade 4 titles.

Grade 5 resources include the Strategy Units from *Moving up with Literacy Place* Grade 4 along with a selection of guided reading books from *Moving Up With Literacy Place* Grades 4 and 5.

Grade 6 resources are *Moving Up With Literacy Place* – Grade 6.

Teachers are encouraged to refer to the Program Design and Components of the *English Language Arts Curriculum Guide*, both [Entry-3](#) and [4-6](#) for guidance for appropriate instructional practices around spelling.

(The *Canadian Spelling Program* [Nelson] is also available for grades 2-6. The Canadian Spelling Program is a provided resource that teachers *may* choose to use, and if they do so, does not have to be used in a linear fashion.)

## MATHEMATICS (EARLY FRENCH IMMERSION-MID IMMERSION)

### Description

Mathematics is more than finding the correct answer. It is a way of making sense of many aspects of the world. Through the study of mathematics, students are able to perceive patterns, comprehend data, perform calculations, make constructions, and reason mathematically.

At the elementary school level, the development of mathematical literacy (numeracy) is the major objective. Mathematical literacy includes the competencies mentioned above; but it also includes being able to communicate about mathematics through speaking, reading, writing and listening. Elementary students must come to understand the intrinsic utility of mathematics. In doing so, they will realize how:

- estimation supplements calculation
- experience balances innovation, and
- problem-solving techniques aid rules of procedure.

The above viewpoints are derived from the goals articulated by the National Council of Teachers of Mathematics as stated in their recent publications.

More specifically, the goals of the Elementary Mathematics Program are to enable all students to:

- Learn to value mathematics
- Become confident in their ability to do mathematics
- Become mathematical problem solvers
- Learn to communicate mathematically
- Learn to reason mathematically.

Living Mathematical experiences in French immersion further enhances the learners' communicative abilities. They acquire and develop linguistic abilities in both official languages as many of the skills are transferable, be they mathematical, communicative, problem-solving, communicative, or metacognitive.

As of the 2010-2011 school year, all classes from Kindergarten to Grade 6 use, as a principal resource, *Chenelière mathématiques* (the translation of Pearson's *Math Makes Sense*) which corresponds 100% to the [PONC \(WNCP\)](#) curriculum adopted by PEI.

## MUSIC (FRENCH IMMERSION)

Music curriculum guides *La musique à l'élémentaire K-3<sup>e</sup>*, and *La musique à l'élémentaire 4<sup>e</sup>-6<sup>e</sup>* are available from the [English Programs Division](#) of the Department of Education and Early Childhood Development for any school wishing to teach the music program in French. See additional notes following Grades 1, 2, 3, and 4, 5, 6 in the Music section of the English Program.

## SCIENCE (EARLY FRENCH IMMERSION-MID IMMERSION)

### Description

The Science curriculum must provide opportunities for children to develop a body of scientific knowledge through inductive, concrete and manipulative learning experiences. *How* children acquire scientific information is as important as committing scientific content to memory. However, it is important to have an appropriate balance between content or knowledge acquisition and process development. While the two can be dealt with separately, it is more appropriate that the science curriculum involve activities which can be used to develop both content and process.

The Program of Studies and curriculum guides are based on the Common Framework of Science Learning Outcomes developed as a result of a joint activity between the Council of Ministers of Education, Canada and participating jurisdictions then harmonized for the Atlantic Provinces by participating members of the Atlantic Provinces Education Foundation.

The primary material used is a translation of “Innovations” and incorporates some local content. Other resources, such as short stories, have also been provided to facilitate integration with the language arts curriculum. This integration is possible because students are encouraged to write about their science experiences, to formulate ideas in their own words, and to discuss and modify these ideas based upon feedback from the teacher and their fellow students.

Emphasis is placed on having students work with laboratory equipment and everyday materials in order to observe and experiment with the science concepts and processes being studied. Participating in such experiences enables students to question, to communicate and to understand science ideas meaningfully.

**SOCIAL STUDIES GRADES 1 - 6 (EARLY FRENCH IMMERSION)**  
**Grades 1-3 (EARLY FRENCH IMMERSION-MID IMMERSION) Grades 4-6**

The grade 1-2-3 program begins with a study of self and progresses through a study of family structures, the school environment, the neighbourhood, and different neighbourhoods (rural and urban). The concept of community is also introduced by having the children study community workers.

In grades 4-5-6, concepts in the areas of geography, history, economics, governance, citizenship, entrepreneurship and human rights are introduced and developed throughout the three years.

In grade 6, a new curriculum titled, *Exploring PEI History* was implemented in the spring of 2008. The PEI History course is designed around seven unifying ideas: *Timeline, People, Transportation, Government, Economy, Lifestyles, and Culture*. The study begins with a “big-picture” look at a time line of Island history and then narrowing to the past 500 years with an emphasis on changes over time. Students will work with a collaborative time line throughout the course of study, adding events, persons, and other notable milestones along the way. The culminating activity provides students with the opportunity to reflect upon what they have learned about P.E.I. History and its influence on their lives today.

## PHYSICAL EDUCATION

Authorized Resources for 2011 Grades K-6 Elementary Physical Education Curriculum:

[Prince Edward Island Physical Education Curriculum Guide, Grades K-6](#) PEI 1/t 101-1868

Cross-curricular links have been made throughout this document. These links are all based on the curriculum that existed in subject areas when this document was being developed.

Fundamental Movement Skills Series – (5 Titles)

Fundamental Movement Skills: Active Start and Fundamental Handbook	PHE	1/s	100-224
Fundamental Movement Skills II: Learning to Train Stage	PHE	1/s	100-221
Fundamental Movement Skills IA: For Children with Physical Disabilities	PHE	1/s	100-222
Fundamental Movement Skills: Active Start and Fundamental Stages – For Children with Developmental and /or Behavioural Disabilities	PHE	1/s	100-223
Fundamental Movement Skills: Beyond the Fundamentals - A Games Approach	PHE	1/s	100-215
Kidnastics	HUK	1/s	100-218
More Fun and Games	HUK	1/s	100-216
No Standing around in My Gym	HUK	1/s	100-219
Teaching Sport Concepts and Skills – 2 <sup>nd</sup> ed.	HUK	1/s	100-217
Orienteering, Level One Basic Skills Series	PHE	1/s	100-225
Teaching Personal and Social Responsibility through Physical Activity – 3 <sup>rd</sup> ed.	HUK	1/s	100-220

The following titles were purchased by the Department of Education and Early Childhood Development over the past few years and distributed to all elementary schools. These were one time only purchases.

Canadian Active Living Fitness Circuit Charts  
 101 Games to Play in a New Way  
 Energize: LD-ENG  
 Intramural Recreation  
 Playground Leadership  
 Convenorology: So You Want to Be a Convenor  
 Intramuralology: A Quick Reference Guide for Intramural Programs  
 Fun First  
 Physical Education For Elementary School Children  
 Ready-to-Use P.E. Activities for Grades K-2, 3-4, and 5-6

A copy of the Prince Edward Island [Physical Education Safety Guidelines](#) document should be available in the gymnasium area. The intent of these guidelines is to focus the teacher's attention on safe instructional practices for all physical activity in order to minimize the inherent element of risk. The guidelines are mandatory.
