FOREWORD

I am pleased to present the *1999 Annual Statistical Review* which provides comprehensive statistical information on the economic and social situation of the Province of Prince Edward Island. I am pleased to present this, the twenty-sixth edition of the Annual Statistical Review.

The Review contains the more frequently consulted socio-economic information on the Province and is an indispensable reference on the Prince Edward Island economy and its people. Statistical tables provide historical and current data at the provincial level and in some cases at sub-provincial levels. The publication also contains a descriptive narrative on the economic performance of the Province over the past year and a short description of the Province, entitled “Facts about Prince Edward Island”.

Additional statistical information can be accessed through the Prince Edward Island government website at <http://www.gov.pe.ca/>. In addition to timely general information about Prince Edward Island, the site contains the *Quarterly Economic Overview*, monthly updates of key economic indicators, as well as an interactive map of Prince Edward Island, which highlights community profiles.

The *Economics, Statistics and Federal Fiscal Relations Division* in the P.E.I. Department of the Provincial Treasury prepared the Statistical Review. The statistics are drawn from a variety of sources, including *Statistics Canada* and Provincial Government departments. All statistics are referenced to their original source and I encourage readers to consult these documents for related or more detailed information on topics of particular interest.

If you have any suggestions, comments, or statistical inquiries, please contact the staff of Economics, Statistics and Federal Fiscal Relations at (902) 368-4030.

PATRICIA J. MELLA
Provincial Treasurer

TABLE OF CONTENTS

I. Facts about Prince Edward Island	ix
II. Economic Review 1999	1

STATISTICAL TABLES

III. Population, Vital Statistics and Labour Force

1. Population, Canada by Province, July 1, 1996 to July 1, 1999	13
2. Population and Vital Statistics, Prince Edward Island, 1988-1999	14
3. In-Migration to Prince Edward Island, by Province of Origin, 1993-1994 to 1998-1999	15
4. Out-Migration from Prince Edward Island, by Province of Destination, 1993-1994 to 1998-1999	15
5. Components of International and Interprovincial Migration, Prince Edward Island, 1974-1975 to 1998-1999	16
6. Population by Sex and Age Groups (as of July 1st.), Prince Edward Island, 1997-1999	17
7. Population of Cities, Towns, Villages and Indian Reserves on Prince Edward Island, 1991 and 1996	18
8. 1996 Census Data on Population, Dwellings, Households and Families	19
9. Labour Force, Canada by Province, 1999	20
10. Employment by Occupation, Prince Edward Island, 1995-1999	20
11. Prince Edward Island Working Age Population, Labour Force, Employment and Unemployment, Annual Averages, 1990-1999	21
12. Prince Edward Island Labour Force, Employment, and Unemployment, by Sex, Annual Averages, 1994-1999	21
13. Estimates of Employment by Sector, Prince Edward Island, 1993-1999	22

IV. General Economic Indicators

14. Average Weekly Wages and Salaries, Total Wages and Salaries for Prince Edward Island, 1988-1999, and by Month, 1999	23
15. Unemployment/Employment Insurance Statistics, Prince Edward Island, 1988-1999	23
16. Personal Income, Prince Edward Island, 1995-1999	24
17. Percentage Distribution of Families by Income Groups, 1997 Prince Edward Island	25
18. Government Transfer Payments to Persons, Prince Edward Island, 1993-1997	26
19. Provincial Gross Domestic Product, Expenditure Based, Prince Edward Island, 1994-1998	27
20. Provincial Gross Domestic Product, Income Based, Prince Edward Island, 1994-1998	28
21. Performance of Gross Domestic Product, Prince Edward Island Relative to Canada, 1992-1998	29
22. Canada Interest and US\$ Exchange Rates, 1997-1999	29
23. Provincial Gross Domestic Product at Factor Cost for Selected Industries, Prince Edward Island, 1995-1998	30
24. Public and Private Investment by Type and by Industry, Prince Edward Island, 1996-1999	31
25. All Items Consumer Price Index, Prince Edward Island, 1994-1999	32
26. All Items Consumer Price Index, Canada, 1994-1999	32
27. Consumer Price Index, Prince Edward Island, Annual Averages of Major Components, 1989-1999	33
28. Consumer Price Index, Prince Edward Island, Year-over-year Percentage Change of Major Components, 1989-1999	33
29. Consumer Price Index, Canada, Annual Averages of Major Components, 1989-1999	34
30. Consumer Price Index, Canada, Year-over-year Percentage Change of Major Components, 1989-1999	34
31. Canadian Industrial Product Price Indexes for Selected Commodities, 1990-1999, and by Month, 1999	35
32. Value of Retail Trade, Prince Edward Island, 1984-1999	36

IV. General Economic Indicators (continued)

33. New Motor Vehicle Sales, Prince Edward Island, 1990-1999.	37
34. International Exports from Prince Edward Island by Principal Trading Areas, 1993-1999, and by Major Commodities, 1994-1999	38
35. Personal Income Tax Returns, Prince Edward Island, Income and Taxes Paid, 1991-1997	39
36. All Returns and Taxable Returns by Counties and Capital City, 1996	39
37. Personal Income Tax Returns, 1996 Taxation Year, Taxable Returns and All Returns by Income, Prince Edward Island	40
38. Personal Income Tax Returns, 1996 Taxation Year, All Returns by Occupation, Prince Edward Island	41

V. Sectoral Development

A. Economic Statistics

39. Value of Building Permits by Type, Prince Edward Island, 1991-1999	42
40. Value of Non-Residential Building Permits by Sector, Prince Edward Island, 1991-1999	42
41. Number of Building Permits by Type of Dwelling, Prince Edward Island, 1989-1999 and by Month 1999	43
42. Housing Starts, Completions, and Under Construction, by Year and Quarter for Prince Edward Island, 1994-1999	44
43. Housing Starts by Type of Unit, Prince Edward Island, 1978-1999	45
44. Farm Cash Receipts, Prince Edward Island, 1994-1999	46
45. Income of Farm Operators from Farming Operations, Prince Edward Island, 1990-1999	47
46. Capital Value of All Farms on Prince Edward Island, 1990-1998	47
47. Farm Debt Outstanding as of December 31st, Classified by Lender, Prince Edward Island, 1995-1998	48
48. Potato Acreage, Production, Farm Price and Value, Prince Edward Island, 1986-1999	48

ECONOMIC REVIEW 1999

SUMMARY

The Prince Edward Island economy expanded significantly in almost all sectors during 1999, in concert with the solid growth in the economies of Canada and the United States. Most of the Province's economic indicators reflected this broad-based growth, with employment up, strong growth in incomes, and business expansion. Based on economic information available to date, the Prince Edward Island Department of the Provincial Treasury estimates that the provincial economy grew by about 3.5 per cent in 1999, as measured by constant dollar Gross Domestic Product (GDP) at factor cost. This is up substantially from the 1.9 per cent growth experienced in 1998. During 1999, the Canadian economy is estimated to have expanded at 4.2 per cent.¹

The leading growth sectors in the province were retail sales, manufacturing, and business services, each recording large year-over-year growth rates. Total farm cash receipts were up strongly in 1999 compared to 1998, despite a slight reduction in the size of the potato harvest and a large decline in cash receipts from cattle sales. The lobster and shellfish fisheries posted higher values in 1999 than in 1998, and the forestry sector had a very strong year for both output and value. The tourism industry continued to benefit from the Confederation Bridge and an increased stock of attractions.

Consumer prices were higher in 1999 as the All-Items Consumer Price Index rose by 1.2 per cent for Prince Edward Island. The increase was due to higher prices for housing, health and personal care products, tobacco and alcohol, and, in the latter part of the year, rising energy costs. Local and national inflation rates stayed within the Bank of Canada target range, providing a favourable climate for consumption and investment. Island employment increased during 1999, with a surge in jobs during the final four months of the year. The average unemployment rate was a little higher during 1999 as compared to 1998, but trended downward from month-to-month, especially in the second half of the year. Total personal income for Prince Edward Island increased by 4.4 per cent in 1999.

Detailed information regarding these trends and conditions for Prince Edward Island will follow a brief overview of the national economy.

¹ The Statistics Canada estimates of Gross Domestic Product by province for 1999 are not available until the latter part of 2000.

THE CANADIAN ECONOMY

The 1990s drew to a close with Canada's economy in the midst of one of the strongest, prolonged growth periods in the nation's history. Adding to a succession of growth years which began in 1992, Canada's economy grew in 1999 at a rate of 4.2 per cent as measured in constant dollars GDP, following 3.1 per cent growth in 1998 (see Diagram 1). The 1999 expansion was led by exports of goods and services (up 9.7 per cent), fol-

lowed by gross fixed capital formation (up 9.3 per cent), and consumer spending (up 3.2 per cent). Government spending was up slightly in 1999, and the Government of Canada for the fourth consecutive year recorded a surplus of revenue over spending and debt servicing.

The year 1999 marked the third consecutive year of strong employment growth, with 390,800 new jobs created during the year. Canada's unemployment rate averaged 7.6 per cent during 1999, but trended lower in the final months to 6.8 per cent, its lowest level in almost 24 years. Most job creation occurred in the following sectors: professional, scientific and technical services (up 6.5 per cent); management, administrative and other support services (up 5.5 per cent); educational services (up 5.1 per cent); manufacturing and construction (up 4.9 per cent); trade (up 4.3 per cent); and transportation (up 3.9 per cent). Employment decreased in agriculture (down 4.2 per cent), forestry and fishing (down 9.2 per cent), and public administration (down 0.9 per cent).

As Diagram 2 indicates, interest rates have been stable during the past two years. Consumption and investment increased as homebuyers, home builders, and commercial real estate investors took advantage of these relatively low and stable interest rates. This resulted in a strong upward trend in the value of building permits during 1999.

The rate of inflation in Canada averaged 1.7 per cent in 1999. The rate was up from 1 per cent in 1998, notably because of higher prices for energy, tobacco, alcohol, per-sonal and health care products, and housing. The inflation trend of the past decade demonstrates the significantly lower rate of price increases since 1991, as can be seen in Diagram 3.

Source: Statistics Canada

Commodity prices reversed course in 1999 following the weak prices of a year earlier, rebounding by about 20 per cent on average in 1999. Strong economic growth in the United States and optimism for the global economy buoyed demand for Canadian resources.

Source: Statistics Canada

Gains in incomes and employment led to higher levels of domestic spending in Canada. Diagram 4 shows the year-to-year growth in the value of retail sales and motor vehicle sales during the 1990s. Big-ticket items, like automobiles, show greater variability in sales than retail sales in general. Retail sales reached \$260.3 billion (up 5.7 per cent), while the dollar value of new motor vehicle sales rose to \$71.5 billion (up 12.8 per cent). Retail sales were particularly

strong in the final quarter of 1999, including a rebound for general merchandise stores.

Canada's manufacturing shipments increased by 9.3 per cent in 1999 compared to 1998, led by motor vehicles, refined petroleum products, and wood products. Canadian exports, particularly those of manufactured goods, once again drove the economy, and Canada's balance of trade moved decidedly in our favour. Exports of goods in 1999 were up 11.9 per cent in current dollars compared to 1998.

THE PRINCE EDWARD ISLAND ECONOMY

GROSS DOMESTIC PRODUCT

Source: Statistics Canada and P.E.I. Provincial Treasury

The Department of the Provincial Treasury estimates Prince Edward Island's Gross Domestic Product (GDP) to have been \$3.0 billion in 1999. Diagram 5 shows the annual growth of the provincial economy since 1993. In 1999 growth is estimated to have been in the order of 3.5 per cent in real terms. Sectors which are estimated to have contributed the most to GDP growth in 1999 were: retail trade (up 9.3 per cent); manufacturing (up 8 per cent); and services to business (up 8.1 per cent). Lower volumes in agriculture (down 0.7 per cent) and fishing (down 0.5 per cent) caused some declines, although both sectors saw increases in terms of their value in current dollars.

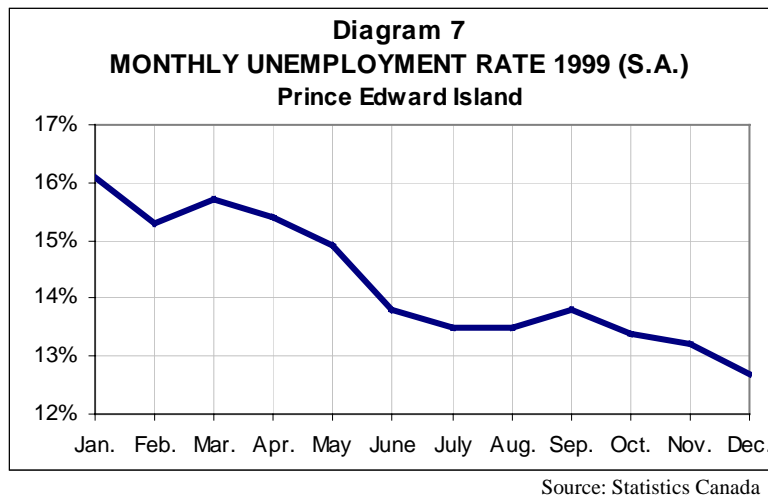

EMPLOYMENT

Provincial employment levels have steadily increased since 1992, as is evident in Diagram 6, which displays seasonally adjusted monthly employment statistics. During the period 1992-1999, employment grew by 15 per cent, from 53,500 to 61,300 employed persons. During the same period the population grew by approximately 5 per cent, while the labour force increased by 10 per cent. Thus, job growth outpaced population growth and labour force growth. The province enjoyed significant employment gains during the fourth quarter of 1999, finishing the year at 63,700 persons.

Source: Statistics Canada

UNEMPLOYMENT RATE

The provincial rate of unemployment averaged 14.4 per cent in 1999, 0.6 percentage points higher than in 1998. However, just as employment rates trended up in 1999, so the monthly unemployment rates (on a seasonally adjusted basis) trended downward reaching 12.7 per cent by year's end, the lowest rate since May 1989 (see Diagram 7). The number of unemployed persons declined in 1999, from a January high of

11,500 to a December low of 9,300 persons. This trend is indicative of the buoyant economic conditions in 1999. The workforce increased through the year as measured by the participation rate, which was 67.2 per cent in December 1999. This compares to a national rate of 65.6 per cent in that month.

INCOME

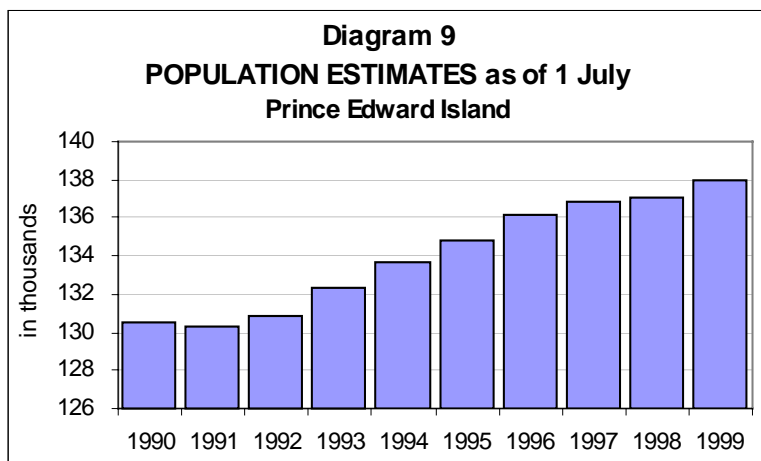

Growth in incomes accelerated in 1999 following many years of slow gains. Total personal income for Prince Edward Islanders rose to \$2.73 billion, a 4.4 per cent increase from 1998. The major contributor to this growth was in labour income. By contrast, government transfers to persons were not a significant factor.

Employment insurance (EI) benefits have declined as a portion of total Prince Edward Island income in recent years. Employment insurance benefits totaled \$164 million in 1999, down 3.8 per cent from 1998. The average weekly benefit payment in 1999 was \$280.00, effectively unchanged from 1998. As seen in Diagram 8, total benefits paid to Islanders have declined by 24 per cent since 1993.

POPULATION

The Island population reached 137,980 on July 1, 1999, an increase of 0.7 per cent over 1998.¹ It has grown each year since 1991, although the overall pace of growth is declining (see Diagram 9). As in other parts of Canada and developed economies, the pro-portion of people 65 years and over in the population of Prince Edward Island is steadily in-creasing relative to the pro-portion of children, teenagers and young adults.

Source: Statistics Canada

INDUSTRIAL PROFILES

EXPORTS

Source: Statistics Canada

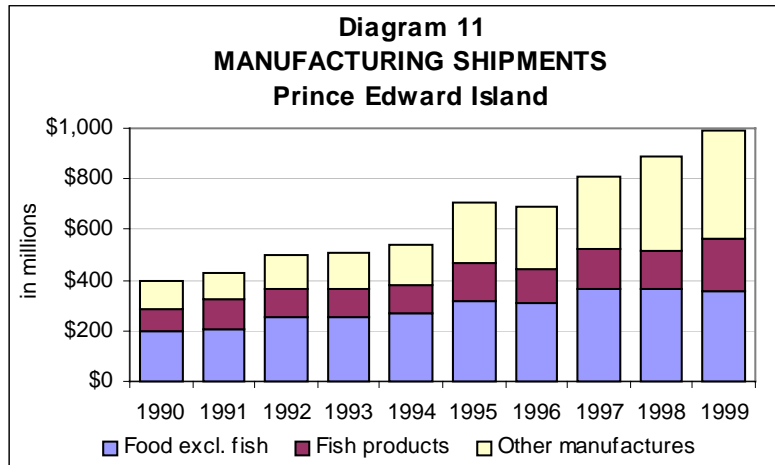

The value of export of goods rose by 19.2 percent in 1999. As is evident in Diagram 10, food and other resource-based products continued to play an important role in exports. The total value of international exports in 1999 was \$560.5 million, including \$426.1 million in food products, \$51.7 million in machinery and equipment, and \$21.8 million in forestry products.

MANUFACTURING

Prince Edward Island's manufacturing sector accounted for 12 per cent of provincial GDP in 1999. On average it employed 6,200 people, 700 more than in 1998. This means that one in every ten employed people now work in the manufacturing sector on Prince Edward Island. Between 1993 and 1999 Island employment in this sector has increased by 2,500 persons or 68 per cent.

¹ Statistics Canada has revised its historical population estimates back to 1996. Therefore, the data in this edition of the Annual Statistical Review are not consistent with earlier releases.

Although food and fish products continue to play a significant role in the manufacturing sector, Diagram 11 clearly indicates the increasing importance of other types of manufacturing. The province's manufacturing shipments were valued at \$986.6 million in 1999, 11.4 per cent higher than in 1998. Food products accounted for 57 per cent of total shipments, or \$560 million, followed by transportation equipment at \$205 million or 21 per cent of manufacturing shipments. The latter activity is largely centered in the aerospace industry, which has developed near Summerside.

Source: Statistics Canada

RETAIL TRADE

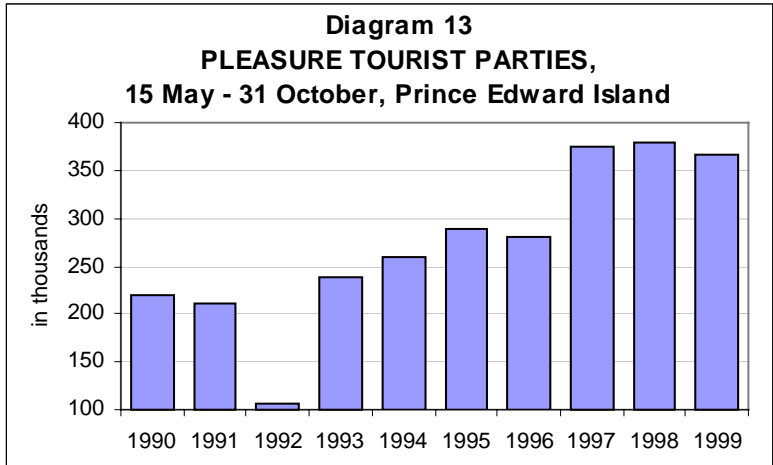

Source: Statistics Canada

Prince Edward Island led the nation in retail sales growth during 1999. Almost \$1.2 billion worth of goods were sold, an increase of 9.8 per cent over 1998. Sales of new automobiles and commercial vehicles totaled about \$56 million and \$67 million, respectively. With an average of 9,600 workers in 1999, the wholesale/retail trade sector is the largest private sector employer in the province. It provides 22 per cent of all service jobs and 16 per cent of all jobs on Prince Edward Island. Furthermore, the number of workers in the trade sector has increased each year since 1994.

TOURISM

The province continues to develop as a premier tourist destination. The large increase in the number of tourist parties visiting the Island since the opening of the Confederation Bridge was largely maintained in 1999 (see Diagram 13, next page). While the total number of pleasure tourist parties was down slightly in 1999, they spent almost \$284 million in 1999, up 3.3 per cent compared to 1998.

Source: PEI Department of Fisheries and Tourism

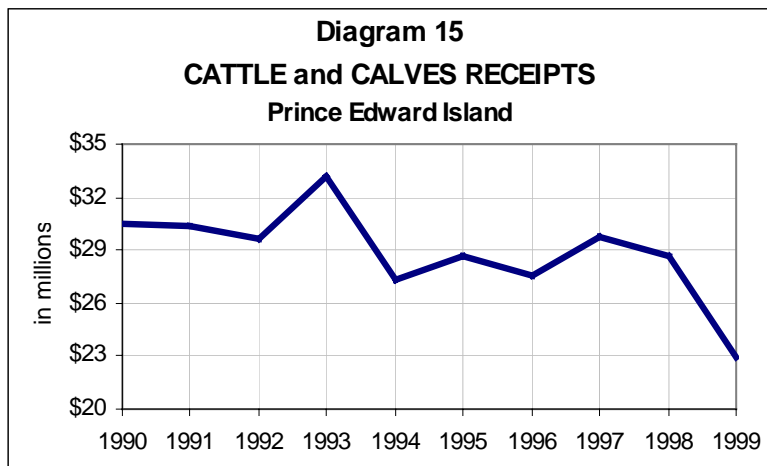

Eighty per cent of the visits to Prince Edward Island were made by Canadians, followed by 15 per cent of visitors from the United States. During the 1999 tourist season, 29.5 per cent of the visitors came from Nova Scotia, 27.2 per cent from Quebec, 8.7 per cent from New Brunswick, and 7.5 per cent from Ontario. The number of U.S. visitors was down by 17.5 per cent in 1999 compared to 1998.

AGRICULTURE

The value of farm cash receipts has been rising since 1997 and reached \$345.9 million in 1999, 10.5 per cent higher than in 1998 (see Diagram 14). Total net farm income increased from \$26 million in 1998 to an estimated \$56 million in 1999. Although potato production declined 1.9 per cent compared to 1998, the value of potato sales increased by 12.4 per cent to \$195 million.

Source: Statistics Canada

Source: Statistics Canada

Diagram 15 shows the value of sales of cattle and calves during the period 1990-1999. In 1999 cattle receipts dropped 20 per cent compared to 1998, from \$28.7 million in 1998 to \$23 million in 1999. On a volume basis, beef slaughtering was down 8 per cent from 1997 to 1998, and down again 24 per cent from 1998 to 1999.

During recent years, the hog industry has been through good times and bad, both locally and in North American markets. On Prince Edward Island, farm cash receipts from hogs reached a high of \$30.6 million in 1996, dropped to \$20.6 million in 1998, and recovered to \$21.9 million in 1999, up 6.1 per cent. The number of hogs slaughtered rose from 195,900 in 1998 to 204,500 in 1999.

FISHERY

Source: P.E.I. Department of Fisheries and Tourism

The upward trend in lobster prices during the last decade is indicative of the continued popularity of fresh lobster and lobster products. Even though the catch declined by 3.8 percent to 18.4 million pounds in 1999 compared to 1998, total re-venue from lobster catches rose by 7.5 per cent, from \$83 million in 1998 to \$89 million in 1999. Movements in lobster prices are shown in Diagram 16. Catches of other shellfish, groundfish, and

pelagic species were up in some cases and down in others. Estimates indicate that shellfish production was 45.9 million pounds in 1999, up from 42.3 million pounds in 1998, with commensurate revenue increases. Finfish and shellfish aquaculture has become a valuable part of the industry, with particular success in the growth of mussel production.

FORESTRY

A strong demand for wood products in North America created a boom in the provincial forestry sector in 1999. The volume of primary forest production was up by more than 33 per cent in 1999 compared to 1998, as can be seen in Diagram 17. Wood industry shipments were at \$49 million, up 50 per cent from the previous year. Production consisted mainly of pulpwood, sawlogs, and fuelwood.

CONSTRUCTION

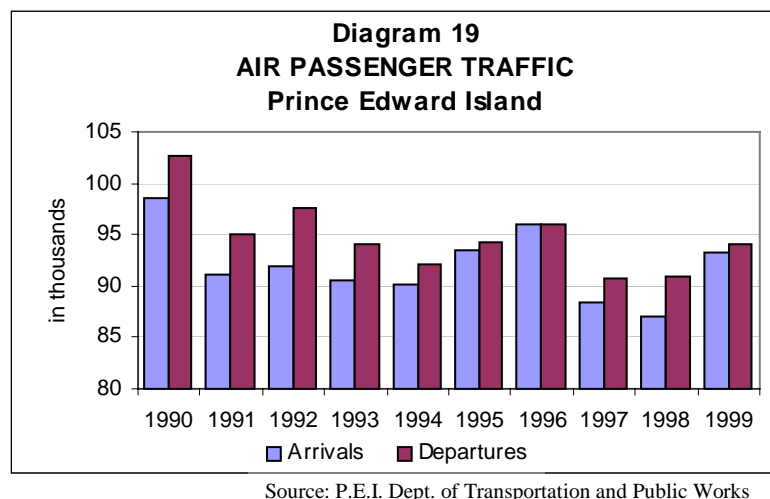

The annual number of housing starts increased by 17.6 per cent on Prince Edward Island in 1999. The number of dwellings under construction increased from 524 units in 1998 to 616 in 1999. Diagram 18 shows the variability in housing starts during the last decade. The value of all building permits issued in 1999 was 21.4 per cent higher than in 1998: \$71.5 million in the non-residential sector and \$69.4 million in the residential sector.

According to Statistics Canada, total preliminary actual investment for Prince Edward Island amounted to \$456 million in 1999, down 1.4 per cent from 1998. This decline was principally the result of reduced investment in machinery and equipment in manufacturing from an unusually high level in 1998. Preliminary statistics also indicate a drop in capital spending in public administration. Total private investments were \$207 million in construction and \$164 million in machinery and equipment, while total public investments totaled \$66 million in construction and \$19 million in machinery.

TRANSPORTATION

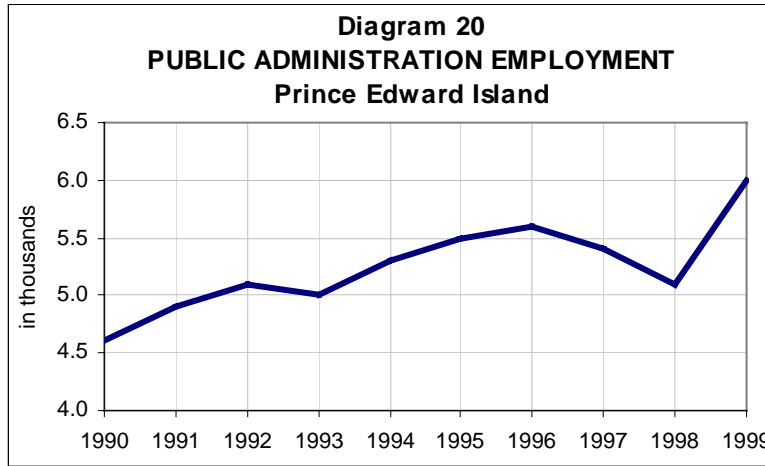

Prince Edward Island has several transportation links: the Confederation Bridge; *Northumberland Ferries* between Wood Islands, P.E.I. and Caribou, N.S.; the *Marine Atlantic* ferry service from Souris, P.E.I. to the Magdalen Islands; the Charlottetown Airport; and the ports of Charlottetown, Summerside, and Georgetown.

The number of passengers flying through the Charlottetown Airport in 1999 totaled 187,277, up 5.3 per cent from the previous year (see Diagram 19). The P.E.I.-Magdalen Islands ferry service saw an increase of almost 7 per cent in its passenger traffic, while the number of vehicles using the service was up by 8 per cent.

The number of passengers taking the P.E.I.-Nova Scotia ferry service was down by 4.3 per cent, while vehicle traffic increased by 2 per cent over 1998. *Strait Crossing International Inc.*, which operates the Confederation Bridge, does not release information regarding traffic crossings on the bridge.

THE PUBLIC SECTOR and PROVINCIAL FINANCES

Source: Statistics Canada *Labour Force Survey*

Diagram 20 portrays employment levels in public administration from 1990 to 1999. As can be seen, in 1999 the public administration sector expanded following declines in 1997 and 1998. Public administration, together with education, health and social services, accounted for 28 per cent of total employment in 1999.

In recent years, fiscal policy at all levels of government has focused on expenditure containment. The Government of Prince Edward Island achieved a surplus of \$6.3 million in Fiscal Year 1998/1999 on revenues of \$857.9 million and expenditures of \$851.6 million. These compare to a deficit of \$6.9 million on revenues of \$797.1 million and expenditures of \$804 million in Fiscal Year 1997/1998. For Fiscal Year 1999/2000, the Government estimates a surplus of \$4.1 million on revenues of \$893.3 million and expenditures of \$889.2 million.

The most notable factor in the improved fiscal position of the Government of Prince Edward Island has been the recovery in revenue. Gross revenue for FY 1999-2000 is estimated to have been \$65.2 million more than budgeted, largely because revenues from sales tax and personal income tax performed better than expected, a reflection of the increased economic performance.

Average number of children per family ⁽³⁾	1.4	1.3	1.3	1.3

* Totals may not equal the sum of the components due to rounding.

Note 1: This table reports raw Census information. Statistics Canada's adjusted total population figure for Prince Edward Island in 1996 was 136,188.

Note 2: For historical and statutory reasons, shelter occupancy on Indian Reserves does not lend itself to the usual classification. Therefore, in 1991 a special category *Band Housing* was created.

Note 3: The average number of children per family is calculated using the total number of children at home and the total number of census families.

Note 1: Statistics Canada's *Retail Trade Survey* was re-designed in 1989. This table displays a new historical series which is different from previous retail trade statistics.

Note 2: Retail sales estimates exclude the *Goods and Services Tax* (GST). Prior to 1991, sales data included the *Federal Sales Tax* (FST). Due to this change in indirect taxes, data for 1991 and subsequent years are not strictly comparable with those of previous years.

Note 3: Department store data for 1991 were subject to major structural changes causing a series break in 1991.

Notes: *Single-detached* is a one-dwelling unit completely separated on all sides.

Semi-detached includes each one of two dwellings separated by a common wall extending from ground to roof, or by a garage. Linked houses were included in this category prior to 1982, but are now included with *single-detached*. Similarly, duplexes which are described as double dwellings, one above the other, are now included with the category *Apartments and others*.

Row housing comprises single-attached houses in a row of three or more dwellings. Row duplexes are not included in this category but are classified under *Apartments and others*.

Apartment and others includes dwelling units found in a wide range of structures such as: duplexes, double-duplexes, triplexes, row-duplexes, apartments proper, and dwellings over, or at the back of, a store or other non-residential structure.

TOTAL DEBT OUTSTANDING	\$309,591	\$331,126	\$372,520	\$408,665

1999 data not available at time of publication.

Notes: *Private Individuals and Others* include credit owed to: supply and finance companies, dealers, stores, private individuals and other unclassified credit sources.

For those institutions providing data based on fiscal year ending March 31, the debt outstanding at that time is used to represent the debt at December 31st of the previous year.

Advance Payments Programs were taken out of the cash receipts estimates from 1971 to date and moved to the *debt outstanding* series. These payments are a type of loan made to farmers since no transaction occurs at the time of the advance. Estimates are derived from data supplied by the *Canadian Wheat Board* and *Agriculture Canada*.

PRINCE EDWARD ISLAND, 1986, 1991 AND 1996**

	1986	1991	1996
Total number of census farms ⁽¹⁾	2,833	2,361	2,217
Total farm population	10,275	8,670	7,810
Total land area (acres)	1,399,040	1,399,040	1,399,040
Area in census farms	673,196	639,693	655,365
Area owned (acres)	494,625	457,865	472,242
Area rented or leased (acres)	178,571	181,828	183,123
<i>Land in crops</i>	386,715	380,796	420,971
<i>Summerfallow⁽²⁾</i>	6,541	2,464	903
<i>Improved pasture⁽³⁾</i>	55,899	47,636	29,221
<i>All other land⁽⁴⁾</i>	224,041	208,797	204,270
Total capital value	\$738,631,854	\$941,533,039	\$1,417,138,775
<i>Value of land and buildings⁽⁵⁾</i>	\$489,544,771	\$656,314,112	\$1,072,281,310
<i>Value of machinery and equipment</i>	\$170,804,062	\$204,824,741	\$269,385,644
<i>Value of livestock and poultry</i>	\$78,283,021	\$80,394,186	\$75,471,821

Note 1: The 1996 Census of Agriculture expanded the definition of census farm. Commercial poultry hatcheries as well as operations that only produced Christmas trees were counted for the first time as census farms.

Note 2: The data for summerfallow have been overstated in previous censuses in geographic areas where the practice is not common. However, a question added to the 1991 questionnaire reduced the extent of over-reporting.

Note 3: The 1996 variable was changed to *Tame or seeded pasture*; therefore, some respondents may have reported differently.

Note 4: For comparability with the 1991 data, *All other land* includes Christmas tree area.

Note 5: 1991 and 1996 data include the value of land and buildings on rented property.

* GHE: Gross Hospital Expenditures OAE: Operating Account Expenditures

Note 1: Prior to Fiscal Year 1997-1998, *Expenditures* were based on *in-province beds* only. For Fiscal Year 1998-1999, *Expenditures* are based on 483 in-province beds and 50 out-of-province beds.

Note 2: *Operating Account Expenditures* is the funding provided by Government to Acute Care Hospitals. With respect to *in-province* Acute Care Hospitals, OAE equals GHE minus Hospital Revenues.

TABLE 81

**CHILD AND FAMILY SERVICES
CHILDREN IN CARE DAYS BY REGION¹
PRINCE EDWARD ISLAND**

County:	Active Number of Children in Care at End of Fiscal Year²		Total Number of Children in Care during Entire Fiscal Year³		Total Number of Children in Care Days for Fiscal Year⁴	
	1998	1999	1998	1999	1998	1999
West Prince	19	25	25	28	6,734	5,714
East Prince	28	40	50	66	10,907	11,474
Queens	116	101	170	159	34,230	33,685
South Kings	14	21	31	31	5,426	4,687
East Kings	7	8	14	17	2,586	2,411
TOTAL	184	195	290	301	59,883	57,971

Note 1: *Children in care* refers to children who are in custody or guardianship of the Director of Child Welfare via voluntary agreement or court-sanctioned order. These children live in foster care homes, group homes or other custodial care arrangements approved by the Director. The age range for this group is from newborns to 18 years of age.

Note 2: *Active number of children in care* - refers only to the current number of children that are in the custody or guardianship of the Director of Child Welfare as of 31 March of that year.

Note 3: *Total number of children in care* - refers to the total number of all children who have been in the custody or guardianship of the Director of Child Welfare during the entire fiscal year. It includes a count of ALL children in care that year and hence will always be higher than the *active* number.

Note 4: *Total number of children in care days* - refers to the number of days that children resided in the custody or guardianship of the Director of Child Welfare during the entire fiscal years in foster care homes, group homes, or other approved residences.
